

IPS

Industrial Profile Systems

Customer service and satisfaction is our goal at Controlled Motion Solutions. Our IPS Design Center is located in San Diego and supports our customers with local inventory, engineering, fabrication, assembly, and installation.

A team of knowledgeable professionals and experienced application engineers have the expertise necessary to provide and implement whatever IPS solution you require.

Our design center has the resources to provide you with a customized solution to match your application requirements.

Complete Line of Profiles & Accessories

IPS modular framing profiles are successfully applied in a variety of environments; from automotive to aerospace, from electronics to packaging.

The following are just some of the industries where IPS modular framing solutions have proven their worth.

- Aerospace
- Automotive
- Educational
- Electronics
- Industrial manufacturing
- Medical
- Packaging
- Pharmaceutical
- Plastics
- Semiconductor
- Textiles
- Tires

Lower your total cost through elimination of costly traditional manufacturing processes.

- No welding
- No cleaning
- No grinding
- No distortions
- No painting

Modular Solutions To Fit Your Needs

IPS

Industrial Profile Systems

Design Center

As a solutions provider, our IPS design center offers products and services such as:

- Standard length profiles
- Custom cut profiles
- Modular structures
- Bases & frames
- Workstations
- Safety guards and enclosures
- Slides & linear devices
- Material handling systems

Profiles

Extensive product range comprises many different profile shapes. This allows the user with the flexibility to apply the components that are most suitable for his application.

Fastener & Connectors

A variety of standard and universal connectors offer unique design features and flexibility. This particular feature eliminates, in most cases, the need for additional gusset plates.

Linear Motion

With its linear motion solutions, IPS has gone beyond the basic framing & guarding requirements. We offer roller bearing modules, and DERLIN slide blocks for motion and positioning applications.

Accessories

No aluminum framing system is complete without its complementary range of accessories. IPS offers an extensive range of accessories such as fasteners, hinges, locks, handles, latches, feet, and casters.

Complete Line of Profiles & Accessories

Comoso can help you design, fabricate and assemble your framing solution

Lighter aluminum frame offers lower total cost by utilizing smaller hydraulic and pneumatic control system components

Modular aluminum structures offer high flexibility and functionality, along with visual appeal
