Switch Specifications
Bulletin 0917-B1
Issued: May, 2000
Supersedes: January, 1994

## Switch Specifications

|  | Reed Switch Assembly* | Solid State Switch Assembly* |
| :---: | :---: | :---: |
| Switching Logic | Normally open, SPST (Form A) | NPN or PNP |
| Supply Voltage Range | 85 to 125 VAC or 5-30 VDC ${ }^{1}$ | 10-30 VDC |
| On-State Voltage Drop | 1.7 V Maximum | See Circuits Below |
| Current Output Range | - | Up to 100 mA at 12 VDC Up to 200 mA at 24 VDC |
| Burden Current | - | 7 mA at 12 VDC 16 mA at 24 VDC |
| Power Rating | 10 Watts (Resistive) <br> 5 Watts (Capacitive) |  |
| Switching Current Range | 30 mA to 200 mA (Resistive) 30 mA to 100 mA (Capacitive) |  |
| Leakage Current | 0 | $10 \mu \mathrm{~A}$ |
| LED Function | Red, Target Present | Red, Target Present |
| Minimum Current to Light LED | 18 mA | 1 mA |

|  | Reed Switch Assembly* | Solid State Switch Assembly* |
| :---: | :---: | :---: |
| Operating Temperature | $14^{\circ}$ to $140^{\circ} \mathrm{F}\left(-10^{\circ}\right.$ to $\left.60^{\circ} \mathrm{C}\right)$ | $14^{\circ}$ to $140^{\circ} \mathrm{F}\left(-10^{\circ}\right.$ to $\left.60^{\circ} \mathrm{C}\right)$ |
| Storage Temperature | $-4^{\circ}$ to $140^{\circ} \mathrm{F}\left(-20^{\circ}\right.$ to $\left.60^{\circ} \mathrm{C}\right)$ | $-4^{\circ}$ to $158^{\circ} \mathrm{F}\left(-20^{\circ}\right.$ to $\left.70^{\circ} \mathrm{C}\right)$ |
| Enclosure Protection | Nema 6, IEC IP67 | Nema 6, IEC IP67 |
| Lead Wire | 2 conductor, 24 Gauge | 3 conductor, 24 Gauge |
| Lead Wire Length | 39 Inches, 1 Meter | 39 Inches, 1 Meter |
| Color of Cable | Black | See Below |
| Switching Response | 300 Hz Maximum | 1000 Hz Maximum |
| Shock Resistance | 30 g | not applicable |
| Vibration Resistance | $10-55 \mathrm{~Hz}, 1.5 \mathrm{~mm}$ Double Amplitude | not applicable |
| 1 Polarity is restricted to DC operation: (+) to Brown (White*) (-) to Blue (Black*) If these connections are reversed the contacts will close, but the LED will not light. |  |  |
| * Note: For MT4 mounts, Tandem and Duplex cylinders, see Bulletin 0830-M2 for applicable switch part number. |  |  |

## Circuits

| Reed SwitchL075250000 <br> L074870000 | NPN Sinking Output | L075280000 |
| :--- | :--- | :--- |
| Part No. .............. L074860000 |  |  |$\quad$| Part No. ................................................ L074880000 |
| :--- |
| NOTE:Polarity must be observed <br> for DC operation only. |

| L075310000 |  |
| :--- | ---: |
| PNP Sourcing Output | L074910000 |
| Part No. .............................................. L074920000 |  |
| Color of Cable .................................................. Gray |  |
| "On" State Voltage Drop ................. 0.2 0.2 Maximum |  |

*Wire colors in parentheses pertain to switches manufactured before 10/15/93.

## Circuit for Switching Contact Protection (Inductive Loads)

## (Required for proper operation 24V DC)

Put Diode parallel to loads following polarity as shown below.

D: Diode: select a Diode with the breakdown voltage and current rating according to the load.
Typical Example-100 Volt, 1 Amp Diode
CR: Relay coil (under 0.5 W coil rating)

## $\triangle$ Caution

- Use an ampmeter to test reed switch current. Testing devices such as incandescent light bulbs may subject the reed switch to high in-rush loads.
- NOTE: When checking an unpowered reed switch for continuity with a digital ohmmeter the resistance reading will change from infinity to a very large resistance ( 2 M ohm) when the switch is activated. This is due to the presence of a diode in the reed switch.
- Anti-magnetic shielding is recommended for reed switches exposed to high external RF or magnetic fields.
- The magnetic field strength of the piston magnet is designed to operate with our switches. Other manufacturers' switches or sensors may not operate correctly in conjunction with these magnets.

## (Recommended for longer life 125 VAC)

Put a resistor and capacitor in parallel with the load. Select the resistor and capacitor according to the load.

## Typical Example:

CR: Relay coil (under 2 W coil rating)
R: Resistor $1 \mathrm{~K} \Omega-5 \mathrm{~K} \Omega, 1 / 4 \mathrm{~W}$
C: Capacitor $0.1 \mu \mathrm{~F}, 600 \mathrm{~V}$

- Current capabilities are relative to operational temperatures.
- Use relay coils for reed switch contact protection.
- The operation of some 120 VAC PLC's (especially some older Allen-Bradley PLC's) can overload the reed switch. The switch may fail to release after the piston magnet has passed. This problem may be corrected by the placement of a 700 to 1 K OHM resistor between the switch and the PLC input terminal. Consult the manufacturer of the PLC for appropriate circuit.
- Switches with long wire leads (greater than 15 feet) can cause capacitance build-up and sticking will result. Attach a resistor in series with the reed switch (the resistor should be installed as close as possible to the switch). The resistor should be selected such that R (ohms) $>\mathrm{E} / 0.3$.
- NOTE: On 5"-8" bores switch will not lay flush with cylinder body.

## Switch

## Mounting Data

1114"-4" Bores

| Bore Size | Reed Switch Assembly | Solid State Switch Assembly |  | A | B | Piston Travel at Midstroke (Inches) (Switch On) ( $\pm .01$ ) | Minimum Activation Distance from End of Stroke (Inches) |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

## $\triangle$ Warning

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS AND/OR SYSTEMS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.
This document and other information from Parker Hannifin Corporation, its subsidiaries and authorized distributors provide product and/or system options for further investigation by users having technical expertise. It is important that you analyze all aspects of your application, including consequences of any failure and review the information concerning the product or system in the current product catalog. Due to the variety of operating conditions and applications for these products or systems, the user, through its own analysis and testing, is solely responsible for making the final selection of the products and systems and assuring that all performance, safety and warning requirements of the application are met.
The product described herein, including without limitation, product features, specifications, designs, availability and pricing, are subject to change by Parker Hannifin Corporation and its subsidiaries at any time without notice.
