*The "30" stands for the mesh size of the support screen.

Suction screens can be used for straining oil, chemical liquids, and water. They will not rust. They're made of tough glass-filled nylon resins with stainless steel wire cloth elements. With male or female NPT connectors, to thread into or onto pipe. There are ten wire mesh sizes to choose from. The finer 60-, 100-, and 200-mesh size screens are backed up with a heavier 30-mesh inner support.

F-24	3						4

Choose a part number from the nut or nipple table and add the mesh size desired from the mesh size table located above.

Example:

A 2-in. nut-style strainer is part number F-16, and ordering it with a 20-mesh wire screen would add "20" to the part number, making it F-16-20.
