## ***Obsolescence planned for . . .***

### ***Prep-Air II "08" 1" FRL Series***

Pneumatic Division North America is announcing the planned obsolescence of the Prep-Air II "08" 1 inch FRL series. The "08" Series will be replaced with the new "P3N" Modular FRL and will be available for one more year ending January 1, 2001. Service kits and parts will still be available after that date to accommodate existing customers. Special pricing requests will no longer be accepted for the "08" as of January 3, 2000. All new 1" FRL business will be specified with the new "P3N" Modular Series.

PDN realizes this is a difficult situation for current customers of the "08" and will help you with converting these accounts to the "P3N". Enclosed is a cross-reference sheet to help with this process. Your regional PAE and local PTM are also available to help in these situations. A user friendly excel conversion program for "08" to "P3N" will soon be available in the New Product Section at [www.parker.com/pneumatic](http://www.parker.com/pneumatic).

The new "P3N" is a global modular FRL that fulfills the need for global modular FRLs. This exciting new FRL offers many features to help fill your 3/4" through 1-1/2" requirements.

Sincerely

  
Todd Kennedy  
FRL Product Manager
