## ***Obsolescence of "08" Series FRL's***

Pneumatic Division North America is announcing the obsolescence of the Prep-Air II "08" 1 inch FRL series. As of December 31, 2000, all 08 FRL's will no longer be available. This will include all of the following items:

- 08F Filters
- 13F Coalescers
- 08R Regulators
- 13R Pilot Regulators
- 08L Lubricators
- 18L Lubricators

Service kits will be available for the "08" series for another 5 years to accommodate existing customers. The "08" Series has been replaced with the new "P3N" Modular FRL. All new 1" FRL business should be specified with the new "P3N" Modular Series. Returns for the "08" Series will be accepted until July 15, 2000.

PDN realizes this is a difficult situation for current customers of the "08" and will help you with converting these accounts to the "P3N". FRL-SIF-72 is a useful cross-reference sheet to help with this process. Your regional PAE and local PTM are available to help in these situations also.

Sincerely

  
Todd Kennedy  
FRL Product Manager
