

56 Series Advantages versus 55/58

Technical Features for 56 Series

56 series is shorter and more compact

- Weight reduction up to 20%
- Easier handling and installation in tight installation areas
- Short length may allow use of hose routing to replace current elbow fittings

Faster & easier hose crimping

- Full length crimp of the sleeve (no marking of crimp length needed), therefore easier, safer and faster crimping vs. 55 series
- Current 55 series dies are qualified and can be used with the 56 series

Product consolidation:

- Consolidation of 3 series into one. (56, 55, 58 = 56) thus reducing the customer inventory
- Easy to choose product range
- Global fitting series:
 - Global availability
 - Global part numbering with metric & inch hex and end connections
