

SUPER-FLEX® 2000

Semi-Hardwall Gasoline Dispenser Hose

UL330/ULC

Series 7124

Series 7124 is designed to dispense or transfer refined fuels such as biodiesel (to B20 in dedicated service), diesel, ethanol (see first note), gasoline and oil. The hose meets all Underwriters Laboratories/Canada (UL330/ULC) requirements. The semi-hardwall construction incorporates steel wire braided reinforcement that reduces meter creep and provides superior strength, crush-resistant durability, kink resistance and a path to conduct a static electrical charge to ground. The cover is resistant to abrasion, cuts, oil and ozone, and will not mar the finish of a vehicle. Series 7124 is suitable for use with reeling devices or applications where retractable cables are employed.

- NOTES:**
- Not UL listed for E85 service.
 - Refer to the table on pages 213-214 for fuel compatibility and service conditions.
 - Refer to the Safety and Technical section of this catalog for safety, handling and use information.

Factory Assemblies: Available from stock in popular configurations that meet National Fire Protection Association (NFPA) 30A and UL 30N4 requirements. Contact Parker Customer Service.

* **Couplings:** Bulk gasoline dispenser hose couplings are not sold separately. Refer to CrimpSource at www.safehose.com for other coupling recommendations and crimp specifications.

** **Stock:** “Y” indicates stocked item; “N” indicates non-stocked item. Stock status subject to change. Contact Parker Customer Service.

⚠️ WARNINGS!

- ▶ Couplings attached with bands or clamps may reduce the working pressure of the hose assembly to less than the maximum rated working pressure of the hose. Refer to the NAHAD Industrial Hose Assembly Guidelines.
- ▶ Do not use Parker gasoline dispenser hose for aircraft fueling applications. Use only API/NFPA qualified hose for aircraft fueling applications.
