

Series 18

Chemically Inert Manifold Liquid Valve

Isolation Manifold

Typical Applications

- Liquid Chromatography Gradient Generation
- Liquid Selection and Mixing Valve

Product Specifications

Physical Properties

Valve Type:	Multi Station Diaphragm Isolation Valve		
Valve Configuration:	2-Way Normally Closed		
Media:	Liquids		
Operating Environment:	40 to 150°F (4 to 66°C)		
Dimensions:	See pages 3, 4 & 5		
Weight:	8 oz (226 g) [2 Station] 10.2 oz (289 g) (3 Station) 12.4 oz (352 g) [4 Station]		
Porting:	1/4-28 Threaded ports		
Internal Volume (µL):		Inlet Path	Outlet Path
2 station	12.6	25.2	42.4
3 station	12.6	25.2	42.4
4 station	12.6	25.2	57.1

The Series 18 is designed for compact installation in multi-liquid systems. Available with multiple inlets and one outlet (or vice-versa), the Series 18 features all wetted parts of PTFE. Tubing and connections between discrete valves are eliminated and dead volume is reduced. Repeatability and rapid response time make the Series 18 ideally suited for controlling small percentages of low flow liquids.

Features

- Provides unsurpassed chemical compatibility for a wide range of media with all wetted parts of PTFE.
- Low internal volume for reduced delay volume
- 100% continuous duty rating in ambient temperatures up to 66°C
- Low power for reduced heat generation and power consumption
- Fast response times for accurate, repeatable results
- Symmetrical design ensures fluid path length and timing is identical for each fluid channel
- 100% tested tight leak rate provides assurance of a quality seal
- Provides reliable operation for the life of your instrument
- RoHS compliant 

Electrical

Voltage (VDC):	9	12	24
Power (Watts):	2.5	2.5	4.2
Current (mA):	273	211	173
Resistance (Ohm):	33	57	139
(Ω±5% @ 70°F, 21°C)			
Connections:	12" Lead Wires Standard 26 AWG, PTFE Insulated		

Wetted Materials*

Seals:	PTFE
Body:	PTFE

* See Chemical Compatibility Page
Consult factory for other options

Performance Characteristics

Operating Pressure/Orifice Diameters:	Vacuum - 20 psig (1.4 bar) / 0.060" (1.52 mm)
Proof Pressure:	1.5X rated pressure
Leak Rate:	Bubble Tight
Response Time:	<12 ms
Recommended Filtration:	10 µm max
Reliability:	Life Cycle Rating of 10 million (Application dependent)

Series 18 Chemically Inert Manifold Liquid Valve

Hit and Hold Specifications:

Hit and Hold is a method for driving valves that can be used to reduce power consumption and heat generation while maintaining valve performance specifications. The valve is “hit” with the full rated voltage for some time period to open it (T1 in the graph) and then “held” open with substantially reduced voltage until the desired pulse length is reached (T2 in the graph). The following table shows the possible holding voltages and power consumption for our standard 12 and 24VDC solenoids.

Rated Voltage (volts)	Hold Voltage	Hold Power
24	8 volts	0.46 watts
12	5 volts	0.44 watts

Note: Other voltages available

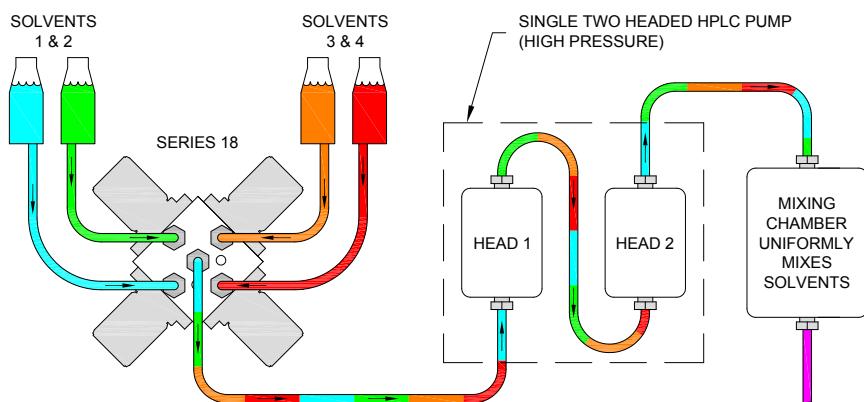

Series 18 Chemically Inert Manifold Liquid Valve Chemical Compatibility Chart*

Chemical	Seals and Body TEFLON® (PTFE)
DI Water	1
Methanol	1
Isopropanol	1
Ethanol	1
Acetonitrile	1
Tetrahydrofuran	1
Toluene	1
Organic Acids - Dilute	1
Non Organic Acids - Dilute	1
Bases - Dilute	1
Saline	1
Bleach 12%	1
Sodium Hydroxide 20%	1

* The above is an Abbreviated Chemical Compatibility Chart. Please consult factory for a complete list.

COMPATIBILITY LEGEND	
1 EXCELLENT	Minimal or no effect
2 GOOD	Possible swelling and/or loss of physical properties
3 DOUBTFUL	Moderate or severe swelling and loss of physical properties
4 NOT RECOMMENDED	Severe effect and should not be considered

Typical Flow Diagram

Proven Performance:

- The Series 18 Valve has been successfully tested to more than ten million cycles with no degradation of components afterwards Passing specifications for:
 - Response time
 - Internal leakage
 - External leakage
 - Repeatability
- Can achieve mix ratios from 99:1 to 1:99 with high accuracy and repeatability.
- The Series 18 Valve has a proven track record in Analytical Instrumentation for over 25 years.

Ordering Information

Orifice Size	Pressure	Valve Type	Number of Stations	Voltage	Part Number
0.062"(1.57 mm)	Vac-20 psig (1.38 bar)	2 Way NC	4	9V	018-0301-900
				12V	018-0074-900
				24V	018-0048-900
			3	12V	018-0083-900
				24V	018-0003-900
			2	12V	018-0012-900
24V	018-0002-900				

NOTE: In order to provide the best possible solution for your application, please provide the following requirements when contacting Applications Engineering:

- Media, Inlet & Outlet Pressures
- Minimum Required Flow Rate
- System Supply Voltage
- Media
- Ambient Temperature Range

Please click on the Order On-line button (or go to www.parker.com/precisionfluidics/s18) to configure your Series 18 Chemically Inert Manifold Valve. For more detailed information, visit us on the Web, or call 603-595-1500.
