Proportional Pressure Regulation
Lucifer® Programmable EPP4 regulators
1/4" and 1/2" Comfort range
Market and/or Sub Market Description

Robotics
Paper industry
Machine tools
Mobile
Buildings
Textile
Instrumentation
Semi conductor

Description of Applications

Welding
Speed and brake control
Sanding
Cutting
Humidification
Tension regulation
Painting
Presses
Polishing
Adaptative suspension control
Value Propositions for Lucifer® EPP4 Comfort Proportional Pressure Regulators

- All parameters fully adjustable through the PC software Calys
- Easy to use software
- Long life expectancy
- Compact and light
- Limited inventory
- Low power
- Flexible remote display positioning
- Proven expertise of Parker, a pioneer in pressure regulation technology

Calys Software

Calys is a unique software in house developed to configure all the parameters of the EPP4 Comfort range. Calys is an option of the EPP4. It will be sent via email if you order cable reference 496449 which permits the communication between the EPP4 and a PC.

Calys offers many capabilities:
- It enables the distributors to keep a main generic EPP4 reference in stock, and adjust it to the needs of each customer application. They can switch for example from 0-10 V to 4-20 mA, or from 0-7 bar pressure range to 0-5 bar.
- Engineers designing a pneumatic system are able to monitor precisely all the important values (electrical or pneumatical) directly on their laptop.
- After sales technicians are able to receive via email all the parameters measured by the EPP4 installed on a machine wherever its location. This way maintenance operations can be done remotely at distance.

See more detailed technical description of Calys in the “Options” part on page 8.
## Lucifer® EPP4 Comfort Technical Data

### Fluids:
Lubricated or non lubricated air and neutral gases  
Recommended filtration: 50 μm

### Temperature range:
- Ambient: 0 to +50 °C  
- Fluid: 0 to +50 °C

### Inlet pressure range:
1 to 12 bar  
(the inlet pressure must always be at least 1 bar above the regulated pressure)

### Outlet pressure range:
0.05 to 10 bar

### Hysteresis:
± 50 mbar (factory set up)

### Air consumption at constant control signal:
0

### Supply voltage:
24 V DC ± 15 % (Max. ripple 1 V)

### Power consumption:
Max. 2.8 W with 24 V DC and constant changes of the control signal  
< 1.5 W without change of control signal

### Control signal:
- Analog 0 - 10 V; standard for 0 - 10 bar; adjustable  
- Analog 4 - 20 mA; standard for 0 - 10 bar; adjustable

### Outlet sensor signal:
- Analog 0 - 10 V; standard for 0 - 10 bar; adjustable  
- Analog 4 - 20 mA; standard for 0 - 10 bar; adjustable  
- Digital 0/24 V for alarm features:  
  - Adjustable pressure error (+/-)  
  - Adjustable delay ON  
  - Adjustable delay OFF  
  - Adjustable logic (+/-)

### Max. flow:
- G1/4: 70 m³/h  
- G1/2: 150 m³/h

### Indicative response time:
With a volume of 330 cm³ at the outlet of the regulator  
- Filling 2 to 4 bar: G1/4 ~ 50 msec; G1/2 ~ 60 msec  
- Filling 2 to 8 bar: G1/4 ~ 100 msec; G1/2 ~ 120 msec  
- Emptying 4 to 2 bar: G1/4 ~ 70 msec; G1/2 ~ 90 msec  
- Emptying 8 to 2 bar: G1/4 ~ 130 msec; G1/2 ~ 190 msec

### Safety position:
In case of control signal failure or if it is less than 50mV, the regulated pressure drops automatically to 0 bar (atmospheric pressure).  
In case of voltage supply failure, the regulated pressure will be kept constant.

### Electrical connection:
- M12 - 8 pin; male connector power supply/control signal  
- M12 - 5 pin; male connector communication

### Life expectancy:
> 50 Mio changes of control signal steps

### Mounting position:
Indifferent (recommended position: upright; electronic part on top)

### Resistance to vibrations:
30 g in all directions

### Protection index:
IP 65

### Assembly:
Silicone free

### Electromagnetic compatibility:
In accordance with  
- EN 61000-6-1: 2001  
- EN 61000-6-2: 2001  
- EN 61000-6-3: 2001  
- + A11 2004 edition (01/07/07)  
- EN 61000-6-4: 2001

### Installation and setting instructions:
See our "Notice 408128, 408134" and appendix supplied with the product.

---

**Note:** Parker reserves the right to change specifications without notification.
Description of Operation

Pneumatic Technology

Construction is made with a full aluminium body.

The piston is fabricated in a special polyacetal and is equipped with high performance dynamic seals, specially developed by Parker Lucifer for this application.

Electronic Technology

The Comfort version uses the board of the EPP4 1/2" Basic range for the regulation functions and a second board for specified options.

Technology used is fully digital. The cancellation of potentiometers allows customers to realise an easy, safe and precise set-up in their production.

Block Diagram

The controller receives both the control signal (set pressure) and the feedback signal from the sensor (outlet pressure).

Any difference between the two amplifier inputs results in a corresponding output which drives the appropriate 2-way pulse width modulated solenoid valve so that the piston moves to correct the pressure.

The same feedback signal from the sensor is used for the output feedback in voltage and current.

The digital signal (alarm) is activated when the conditions (out of pressure or time tolerance) are met.

Flow Curve 1/4"

Flow Curve 1/2"
Lucifer® EPP4 Comfort Options

Additional Features

The EPP4 Comfort offers **two main options** - a **remote display** and a **software** to easily set the regulator's parameters.

These are the key feature options for a comfortable use.

- A remote display connected to the pressure regulator offers flexible monitoring.
- A panel mounting kit is available to install the remote display.
- Calys is an easy-to-use software package designed to allow the user to match his regulators performance directly to his specific application.
- A power supply and control signal cable.

The B connector offers connection to the remote display or the PC.
Lucifer® EPP4 Comfort Options

Remote Display

This option includes the Remote Display and 1.5 meter connecting cable.

This device is part of the EPP4 Comfort & Display pack, it is not sold separately.

Order the P4CGX002 series (vs the P4CGX001 corresponding to the version without a display).

Compact and highly readable remote LED display:
- Bar and PSI scales
- Security lock
- 1.5 m cable
- Mounting brackets

Panel Mounting Kit

Order the Panel Mounting Kit under reference 496601
Lucifer® EPP4 Comfort Options

Calys Software

Calys is a software to set all relevant parameters of the Lucifer® EPP4 Comfort.

The cable 496449 (option) is needed to let the EPP4 communicate with any configured PC, this software is supplied free of charge with each cable unit.

Calys offers the following features:

- Live monitoring (control signal, regulated pressure, supply voltage, …)
- Recording of the main parameters (control signal, regulated pressure, supply voltage, …) in an Excel file
- Free calibration for the inputs and outputs
- Adjustable alarm (positive-negative, pressure limits, delays)
- Configuration files easy to duplicate
- Complete and interactive help file
- Data in 4 different pressure units
- Menus in 4 languages (English, German, French and Italian)
- Cable 496449 with RS-232 and USB connection

Power Supply / Control Signal Cable

- 2 m cable with moulded M12-8 pins connector

Order the PC software (including cable) under reference 496449

Order the power supply / control signal cable under reference 496796

WARNING - USER RESPONSIBILITY
FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH,
PERSONAL INJURY AND PROPERTY DAMAGE.

• This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

• The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

• To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.
Parker’s Motion & Control Technologies

At Parker, we’re guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 00800 27 27 5374.
