## Revision 4.2 12/18/2020

### New Functionality:

- Updated to Harman Flash Player Version 50.0.20.325

## Revision 4.1 6/6/2016

### New Functionality:

- Support for new XT hardware. XT00, XT07, XT10, XT15, XT22 (Resistive Touch), XT22 (Capacitive Touch)
- Support for Parker COMM Server 5.0
- Support for two LAN Ports.
- XPR-2223: Additional support for Web Link button to be addressed with a Network Share

### Bugs Fixed:

- XPR-1613: Xpress Message Display in runtime not using full width of display.
- XPR-1735: Xpress in 24/7 operation locks up at random intervals.
- XPR-2351: Xpress 3.0 Log Out default.
- XPR-2363: Perceived bug due to length of time required to upgrade application to 3.0.
- XPR-2505: Startup user not correct after editing the Admin User password and startup user.
- XPR-2506: Exported tags addressed using a tag name, when imported, do not immediately work.
- XPR-2527: Tag Scaling in Recipe does not work correctly.
- XPR-2528: Xpress Project Name edited on Runtime is not saved.
- XPR-2529: Font alignment in the message display not correct for Align Center/Right.
- XPR-2560: String values entered into message tool that contain \ or " have a \ prepended when sent to PLC.
- XPR-2667: Recipe Viewer unable to select last row for editing.
- XPR-2702: Trend Tool Pen Tag assignments fail.

## **Revision 3.1**

**08/27/2014**

### **New Functionality:**

- Recipe\_RecipeStatus System Tag: Shows the last action performed by any Recipe Tool in the project.
- Recipe\_LastRecipeSent System Tag: Shows the name of the last downloaded Recipe.
- System\_Command System Tag: Can be used to close and restart the local Viewer on the XPR/XPR2.
- Runtime Setting: Use Large User Access Error: Will scale the User Access Error symbol to fit the entire tool.
- Ability to Log on the Local/Remote Startup User after a User Inactivity Timeout.
- Recipe Viewer will resize column width dynamically in Runtime to fit the Item Name or Item Value.
- Creation of Recipe Groups: Recipes can be grouped together, Recipe Viewers can be configured to display all groups or selected groups.
- All Flashbacks are installed with Xpress Manager.

### **Bugs Fixed:**

- XPR-2326: Font Sizes changing when making an on-line copy of the tool.
- XPR-2274: Font Size changes on tools copied from one panel to another.
- XPR-2171: Font Sizes not converting from 2.0.4 to 2.1.7.
- XPR-2170: Language setting not maintained during upgrade to 2.1.7.
- XPR-2167: Web content not transferring during direct to disk project download.
- XPR-1983: Tag drop down menu for New Alarms and New Recipes is sticking.
- XPR-1981: Xpress import of a message file with the same name breaks the link in the message tool.
- XPR-1737: Expression Validation in Designer is failing.
- XPR-1684: Recipe loading popup may show no Recipes even when Recipes exist.
- XPR-1683: Selection Entry Menu has a cosmetic overlap in Designer.
- XPR-1682: Translated text not appearing in pop-up tools.
- XPR-1680: Numeric Entry tool is not retaining its value when a panel is switched.
- XPR-1670: Xpress report print function causes Xpress to lock up and crash.
- XPR-1669: Xpress Print Report does not print images of screens.
- XPR-1646: Xpress Manager with COMM Server open will lose focus.
- XPR-1611: Xpress Recipe Save As could cause an Import failure.
- XPR-1517: SWFs do not scale properly.
- XPR-1494: Language change does not translate an open selection pop-up.

### **Documentation Updates:**

- Recipe Tool updates.
- System Tags updates.

## **Revision 3.0**

**07/16/2013**

### **New Functionality:**

- Added iOS/Android device compatibility.
