## Banner’s Lighting and Indication Solutions

### LED Lighting

Robust, high-quality and energy-efficient LED Lighting products have sleek designs and are ideal for a wide range of industrial and mobile applications.

### Signal Tower Lights

Premium LED-based, stylish Signal Tower Lights are completely flexible with preassembled or modular models to suit application needs, and have a wide range of mounting accessories for quick and easy installation.

### Indicators

Rugged Indicators require no additional protective enclosure and are flexible in design, size and mounting for a unique indication solution.

### Touch Buttons and Pick-to-Light

Touch Buttons come in a variety of options for lighting and touch functions and have unique, rugged packages that require no additional protective enclosure.

Rugged, unique Pick-to-Light products help reduce assembly time and increase quality for online and offline operator guidance processes.

How to Reach Us
Light Up the Visual Factory

Enhance your Visual Management Efforts with Banner’s Lighting and Indicators.

Illuminate the Work Area with LED Lighting

- Boost Worker Productivity
- Improve Product Quality
- Increase Worker Safety

Electrical Panel Lighting

Machine Lighting

Workstation Lighting

Visual Inspection Station
Communicate Status

- Empower Operators
- Alert Supervisors
- Accelerate Resolution

Increase Efficiency with Light-Guided Part Picking

- Reduce Cycle Time
- Error-proof Assembly
- Streamline Training

www.comoso.com
Increase productivity, improve product quality and reduce costs with Banner’s industrial LED lighting products. Banner has a suitable model for the harshest environments – even chemical, extreme temperature and washdown areas.

**Boost Productivity** – Proper light levels increase the speed and accuracy of visual task performance, reducing assembly times and increasing output.

**Enhance Inspection** – White, colored and multicolored options in different form factors allow for control of color, intensity and angle, improving detection of part defects during assembly and inspection.

**Reduce Costs** – Reduce costs by eliminating wastes such as defects, waiting, overproduction, transportation and others in the production environment.
Highly visible indicators with real-time feedback provide guidance and status information for assembly and kitting applications.

**Accelerate Processes** – Colored indicators guide operators quickly to the correct part location and accelerate training procedures.

**Improve Quality** – Integrated feedback drives increased operator accuracy and provides quality control metrics.

**Save Time** – Save Time - easily retrofit existing equipment with new solutions.
Machine status indicators with clear on and off states provide improved communication across the manufacturing floor. Wireless options simplify installation, facilitate remote monitoring and data collection, and allow for rapid status communication in and out of the plant.

Reduce Downtime – Immediate attention to problems as they occur reduces downtime, improves quality and reduces safety issues.

Speed Recognition – Status is conveyed through color, position, text, symbols or audible alarm. No time is lost deciphering the information.

Speak Globally – Products are certified for use around the world and conform with international standards. Rely on Banner’s vast network to support you fully.
Operators and supervisors with clear information when and where they need it react quickly and correctly, resulting in efficient problem resolution. Long term gains in overall equipment effectiveness follow from continued monitoring and data analysis.

**Empower Operators** – Illuminated indicators, touch buttons and E-stops show status clearly, giving workers the ability to act quickly and confidently when problems occur.

**Alert Supervisors** – Tower lights, indicators and advanced lights communicate machine, work cell and inventory status, helping supervisors identify and resolve issues effectively.

**Maximize Uptime** - Wireless and standard devices can track machine and operator performance, allowing for effective scheduling of maintenance and changeovers.

Trends

Illumination + Indication
Unlock new user benefits throughout the manufacturing floor and help staff meet important management objectives.

Supply Chain Simplification
Standardizing on a single, flexible model simplifies ordering and spare parts without sacrificing functionality.

Customization
Work with Banner on a variety of modifications to get exactly the solution you need.

- Light sections can be permanently laser marked with custom text or images
- Wireless options to avoid costly wiring runs
- Multiple colors in one unit with flexible I/O configuration
- Cascadeable lights
- Magnetic mounting options for easy installation and portability
- Variety of audible options, including programmable
- Color and animation options available
What is IO-Link?
IO-Link (IEC61131-9) is an open standard serial communication protocol that allows for the bi-directional exchange of data from sensors and devices that support IO-Link and are connected to a master. The IO-Link master can transmit this data over various networks, fieldbuses, or backplane buses, making the data accessible for immediate action or long-term analysis via an industrial information system (PLC, HMI, etc.). Each IO-Link sensor has an IODD (IO Device Description) file that describes the device and its IO-Link capabilities.

5 Advantages of IO-Link

1. Standardized and Reduced Wiring
   IO-Link devices do not require any special or complicated wiring, but can be connected using the same cost-effective standard unshielded 3-wire cables as conventional discrete I/O. In addition, IO-Link also eliminates the need for analog sensors and reduces the variety of cord sets required for sensors, which saves inventory costs. IO-Link also supports a master-slave configuration with passive connection points, which further reduces wiring requirements.

2. Increased Data Availability
   Access to sensor-level data helps ensure the smooth operation of system components, streamlines device replacement, and enables optimized machine maintenance schedules—all of which save costs and reduce the risk of machine downtime.
   This wealth of valuable data made available through IO-Link is integral for the Industrial Internet of Things (IIoT) and Industry 4.0 initiatives.

3. Remote Configuration and Monitoring
   With IO-Link, users can read and change device parameters through the control system software, enabling fast configuration and commissioning that saves time and resources. In addition, IO-Link allows operators to dynamically change the sensor parameters from the control system as needed—such as in the case of product changeover—which reduces downtime and allows machines to accommodate greater product diversity.
   In addition, the ability to monitor sensor outputs, receive real-time status alerts, and adjust settings from virtually anywhere allows users to identify and resolve problems that arise on the sensor level in a timely manner. This capability reduces costly downtime and improves overall efficiencies.

4. Simple Device Replacement
   In addition to the ability to remotely adjust sensor settings, IO-Link’s data storage capability also allows for automated parameter reassignment in case of device replacement (also known as Auto-Device Replacement or ADR). Users can import existing sensor parameter values into a replacement sensor for seamless replacement, getting the new device up and running as quickly as possible.

5. Extended Diagnostics
   IO-Link provides users with visibility into errors and health status from each device. This means that users can see not only what the sensor is doing but also how well it is performing—a valuable insight into a machine’s efficiency. In addition, extended diagnostics allow users to easily identify when a sensor is malfunctioning and diagnose the problem without shutting down the line or machine.
   The combination of real-time and historic data not only reduces troubleshooting efforts as issues arise but also allows for optimization of machine maintenance schedules, saving costs and increasing efficiency in the long term.
Wireless Monitoring and Status Indication

Wireless monitoring and indication products from Banner Engineering can increase productivity, reduce downtime, and provide data to optimize your operation. Banner’s wireless products eliminate expensive cable runs, are easy to install and set up, and can integrate machines that were not previously network capable.
Node
The Node collects data and wirelessly transmits this data to the Gateway.

Gateway
The Gateway accepts data and interfaces to the control system and plant networks or can be wired directly to discrete I/O devices.

Wireless TL70 Tower Light
A bright 70 mm tower light with wireless networking provides local and remote status information and has inputs for process monitoring.

Wireless K70 Touch Button
The K70 touch button is an ergonomic solid state switch with integrated multicolor indication functions. Bidirectional wireless communication provides a simple operator interface for pick-to-light, call button, and general industrial applications.

Wireless K70 Indicator
Bright, multicolor K70 indicators offer status indication and remote monitoring in a compact package for greater versatility in deployment.

Wireless Q120 6-Button Pendant
The wireless Q120 6-button pendant is an autonomous node with six independent push button inputs and six sets of LED indicators.

Wireless Q45U Node
The Q45 universal node works with all Sure Cross® sensors with a 1-wire serial interface.

Control Your Wireless Networks with the DXM100 Controller
The DXM100 is an industrial wireless controller developed to facilitate Ethernet connectivity and Industrial Internet of Things (IIoT) applications.

Extended connectivity to smart devices via Ethernet or GSM/Cellular

LED Lighting

Banner Engineering’s industrial LED lighting products are high-quality and energy-efficient lights that provide bright illumination for up to 50,000 hours. Robust, vibration-resistant housings and sleek designs make Banner Engineering’s LED lighting ideal for a wide range of industrial applications, including machine lighting, enclosure lighting, visual inspection illumination and work cell lighting.

WLS28-2 LED Strip Lights

- Compact, space-saving design
- Rugged, water-resistant IP69K option
- Available in 8 lengths from 145 to 1130 mm
- Lensed models or choice of clear or diffuse window
- Cascade models for connecting multiple lights end-to-end, minimizing wiring
- UV 365 nm and 395 nm wavelength models available for UV fluorescent and non-fluorescent applications
- High/Lo/Off switch and non-switch models available
- Low power consumption less than 9 watts per foot
- Optional snap clips for easy installation and repositioning
- Automatic temperature protection built into the unit. Above 50 °C, the light dims to manage heat and protect product lifetime

WLS15 LED Strip Lights

- Low-profile design for easy installation in tight spaces
- 12 or 24 V dc operation in one model
- Completely sealed with an IP67 rating for use in wet or dusty environments
- The rugged construction and polycarbonate shell resists shock and vibration while remaining lightweight
- LED lighting technology saves energy and minimizes replacement costs
- Brackets and connectors are available to keep installation simple
- Draws half the current of other lights for a low power device and high energy savings
- Offers stability in the presence of line voltage fluctuations
Supply Voltage and Current
12 V dc or 24 V dc nominal

Construction
Clear anodized aluminum inner housing; Polycarbonate outer housing, Polyamide end caps

Environmental Rating
Rated IEC IP66 and IEC IP67
Suitable for wet locations per UL 2108

Operating Conditions
Temperature: –40 to +60 °C
Storage Temperature: –40 to +70 °C

WLB32 LED Light Bar

- Energy efficient for overall cost savings
- High/Low/Off switch allows users to customize light levels
- Available as cascadable models for a continuous length of lighting, with a minimum of wiring
- Metal housing, shatterproof window
- Easy installation with snap clips, or a choice of magnetic or angle brackets
- Available in AC or DC models
- Available in 285 mm, 570 mm, 850 mm or 1130 mm
- Motion detection models are ideal for locations that cannot use a physical switch or where the placement of the switch is not useful
- Models featuring an eye shield window block direct line of sight to the domed window to increase eye comfort

WLS27 LED Strip Lights

- Cylindrical shape design, ideal for laminar airflow applications
- Rugged, water-resistant IP66, IP67 and IP69K construction
- Chemically resistant copolyester housing
- Available in eight lengths from 145 mm to 1130 mm
- Daisy chain power to multiple lights
- Capability to dim lights using the wiring pinout (Hi/Lo/Off)
- Optional snap clips for easy installation and repositioning
- Automatic temperature protection built into the unit. Above 50 °C, the light dims to manage heat and protect product lifetime
**Supply Voltage**
12 to 30 V dc

**Construction**
Housing: Copolyester

**LED Lifetime**
Single color: 75,000 hours
Dual Color: 50,000 hours

**Environmental Rating**
IEC IP67, IP66, IP69K per DIN 40050

**Operating Temperature**
-40 to +70 °C (-40 to +158 °F)

**Certifications**
UL, CE, C-Tick

Heavy-Duty LED Lights

- Oil, chemical, and water resistant with IP67, IP68g, and IP69K ratings
- High brightness paired with advanced glare-reducing optics
- Easy-to-install with a wide variety of mounting solutions
- Resistant to vibration and shock
- Input voltage of 12–30 V dc
- Models have four discrete intensity level settings
- Available with stainless steel or nickel-plated aluminum housing
- High temperature models now available in a black E-coated aluminum housing
**WLC60 Standard**

WLC90 Heavy-Duty LED Light

- Oil, chemical and water resistant with IP67, IP68g and IP69K ratings
- Vast operating temperature range internal monitoring circuit dims the LEDs to a safe level at extreme temperatures
- Three lens choices to suit many application needs
- Pan-and-tilt brackets for versatile mounting to direct the light in any direction
- Models have three discrete intensity level settings
Supply Voltage
12 to 30 V dc

Construction
Housing: Nickel-plate aluminum
Window: polycarbonate or borosilicate glass

LED Dimming Controller & Dimmable LED Lights

- Works with special models of the strip lights, heavy-duty lights, area lights, spot lights and work lights
- High-frequency modulation allows for precise intensity control and flicker-free illumination
- Allows for control of multiple lights with one module
- LED Pulse-Width Modulation (PWM) versions of LED lights can be controlled by other PWM output devices as well as Banner’s controller
- Ability to control intensity from zero to 100 percent to suit the level required for the application
- Helps further increase energy savings, helping to reduce overall energy costs

Flex Arm

- Versatile mounting options including magnetic mount, clamp mount and flange mount
- Vinyl coated to protect against moisture
- Adjustable arm allows for easy repositioning of light to suit many application needs
- Concentrate light exactly where needed
- Portability with magnetic and clamp mount options
- Available for use with spot lights, work lights and vision spot lights

Signal Tower Lights

Multi-segment LED tower lights give machines a voice, conveying critical information in a clear, visual manner. AC and DC voltage, fourteen color options, six audible alarm styles, multiple intensity levels, three connection types and optional wireless or IO-Link communication give almost limitless possibilities in both preassembled and field configured units.

TL70 Tower Lights

- 70 mm diameter with bright, colored LEDs for long range visibility
- Light segments appear gray when off to eliminate false indication from ambient light
- Modular design and simple wiring for fast field configuration; preassembled models also available
- Rugged, water-resistant IP65 housing with UV stabilized material
- Top-mounted audible modules from 75 to 101 dB, including multi-tone and programmable audible models allow for custom alerts or announcements; all work with the same standard bases
- Wireless base and segment models quickly enable remote monitoring and control of status lights; unleash IIOT capability
- Match your machine with a choice of black or gray housing

TL50 Tower Lights

- Available in models featuring IO-Link communication for easy integration into most industrial networks and remote control and monitoring of light and audible segments in the fixture
- Built-to-order configure your model today using our online tool
- Installs directly on machine quickly and easily with pre-wired or quick-disconnect options no assembly required
- Features a completely self-contained design no controller needed
- Displays up to 7 colors in a single tower choice of 10 colors in standard brightness and 5 colors in high brightness tower lights
- Allows multiple lights to be on simultaneously
- Eliminates false indication from ambient light; indicators appear gray when off
- Available in Universal AC Voltage models

TL50C Compact Tower Lights

- Ideal for status indication on small to mid-size pieces of equipment
- Displays up to five stacked colors in one tower with universal ac voltage and up to seven stacked colors in one tower with standard dc voltage
- Half the height of standard TL50 models
- Bright, uniform lighted segments with 10 color choices available
- Available with standard, sealed or Omni-Directional audible
- Compact, sleek, rugged design with IP67 models available
- DC models work down to 12 volts, allowing for use in battery-powered mobile equipment

TL50BL Beacon Tower Lights

- Housing is UV stabilized, making it suitable for use in outdoor environments.
- Highly visible indication for indoor or outdoor applications.
- Compact, stylish design with rotating and flashing options.
- Audible alert: continuous, pulsed and staccato models available.
- Omni-Directional audible models provide clear annunciation in the noisiest environments.
- Models available with rugged, water-resistant IP67 housing.

CL50 Column Lights

- Rugged, cost-effective, and easy-to-install multicolor indicators
- Illumination provides easy-to-see operator guidance and equipment status indication at long distances
- One-, two-, or three-color models available
- The LED light sources provide long life with low power consumption
- 100 to 240 V ac operation or 18 to 30 V dc operation
- Compact devices are completely self-contained—no controller needed—and IEC IP67 rated
- Immune to EMI and RFI interference
- No assembly required
Supply Voltage: 12 to 30 V dc or 21 to 27 V ac
100 to 240 V ac

Construction: Bases and Covers: ABS
Light Segment: Polycarbonate

Environmental Rating: General-Purpose and Sealed Audible: IEC IP67
Standard Audible: IEC IP50

Operating Temperature: General-Purpose:
−40° to +50° C (−40° to +122° F)
Standard and Sealed Audible:
−20° to +60° C (−4° to +140° F)

Certifications: 

Audible
max. intensity 92 db @ 1 meter (typical)

Sealed Audible
max. intensity 94 db @ 1 meter (typical)

Sealed Omni-Directional Audible
Standard: max. intensity 99 db @ 1 meter (typical)
Intensity Adjust: max. intensity 95 db @ 1 meter (typical)

Indicators

Banner’s Indicators offer a wide variety of bright, highly visible models ranging from daylight visible to multiple colors in one device. Indicators have a rugged design for long-term use and require no additional protective box. Flexibility in design, size and mounting provides a unique solution for many indication applications.

K50L2 and K30L2 Domed Indicators

- Bright, even indication in red, green, blue, yellow, cyan, magenta, and white
- Rugged IP66, IP67, and IP69K polycarbonate housing protects against impact and withstands high-pressure, high-temperature washdown to ensure reliable performance in challenging environments
- Models constructed from FDA-grade materials available for use in food and beverage applications
- Simple wiring plan enables quick installation and allows users to consolidate controller outputs
- An optional audible alarm provides a distinct, loud notification of status (K50L2 models only)
- IO-Link enables full control of color, flashing, dimming, and advanced animations like rotation, strobing, 2-color display, 2-color rotation, 2-color flashing, and chase
Seven colors now available in one unit

K50L and K30L Domed Indicators

- Rugged, cost-effective and easy-to-install indicators
- Illuminated dome provides easy-to-see operator guidance and indication of equipment status
- Compact devices are completely self-contained — no controller needed
- Displays up to five colors
- Immune to EMI and RFI interference
K50L/K30L Specifications

Supply Voltage
- K50L Sealed Audible: 12 to 30 V dc
- K50L AC: 85 to 130 V ac
- K50L standard: 18 to 30 V dc
- K30L: 10 to 30 V dc

Construction
- Base: polycarbonate
- Translucent Dome: polycarbonate

Environmental Rating
- Standard Models: IEC IP67 Integral QD models meet DIN 40050 (IP69K)
- Standard Audible Models (A1, A2, AL1): IP50
- Fixed Audible Sealed Models (AS): IEC IP67/IP69K per DIN 40050
- Adjustable Loud Audible Sealed Models (ALS, ALS4): IEC IP67/IP69K per DIN 40050

Operating Temperature
- Sealed Audible: −20 to +50 °C (−4 to +122 °F)
- All Other Models: −40 to +50 °C (−40 to +122 °F)

Certifications
- Audible: 42 m
- Fixed Audible Models (AS): No open cavities to collect liquids

K50L2/K30L2 Specifications

Power
- K50L2: 10 to 30 V dc; 220mA Max. at 10 V dc; 100mA Max. at 30 V dc
- K30L2: 10 to 30 V dc; 60mA Max. at 10 V dc; 30mA Max. at 30 V dc

Operating Conditions
- −40 to +60 °C (−40 to +122 °F)

Construction
- Base: polycarbonate
- Translucent Dome: polycarbonate

Environmental Rating
- Sealed Audible: IEC IP50
- K30L2: IEC IP66/IP67/IP69K

K50L Daylight Visible Directional Indicators

- Intense levels of light output for outdoor applications
- Rugged, cost-effective and easy-to-install
- Compact devices are completely self-contained — no controller needed
- Up to three colors in one housing
- Immune to ambient light, EMI and RFI interference
- 50 mm diameter with flat profile and 30 mm mounting base
- Available in both 18 to 30 V dc and 85 to 130 V ac power options
One- or Three- Color Indicators, 15 to 30 V dc

K50 and K30 Hazardous Indicators

- Up to three colors in one device and five colors to choose from
- Models rated to IP67 and IP69K for use in harsh environments
- Unique design appears gray when off, eliminating false indication from ambient light
- Easy mounting and configuration
- Extensive approvals ensure indicator lights are safe to use in most classified zones or areas.
- Worldwide IECEx approval for quicker access into countries outside Europe and North America
Supply Voltage
Ex ia: 8 to 30 V dc
Ex mb/Ex ta and Ex nA/Ex tc: 10 to 30 V dc

Construction

S18L & S22L Barrel Indicators

- Gasketed face flange for sealing to enclosures
- IP69K rated to withstand harsh wash-down environments
- Daylight visible models are also available for areas with high levels of ambient light
- M12 Euro connector models available for plug-and-play indication
- 10 to 30 V dc operating range allows for use in battery-powered mobile applications
- Terminal-wired models available to simplify panel wiring
- Up to three independent colors in one unit
- Translucent face appears gray when off to avoid false indication
- Multiple colors available, including green, red, yellow, blue, white, orange
- Available with PNP or NPN input, depending on model

Touch Buttons and Pick-to-Light

Banner is the leader in ergonomic, visual and sealed operator touch buttons for industrial applications. Since Banner Touch Buttons can have multiple colors and I/O capabilities, they can replace several conventional buttons, making them ideal in lean manufacturing environments.

Pick-to-light sensors help industrial automation manufacturers reduce the risk of error in the assembly process, boosting product quality and reducing cost.

Illuminated buttons are available with different logic options to solve a variety of applications with optimized wiring. Multicolor models provide clear operator guidance to improve speed and accuracy.

### Logic Functions

**PICK-TO-LIGHT:** Two-color logic options for error-proofing, picking, putting and verification

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C</td>
<td>Input activates Color 1. Touch activates Color 2 and Output.</td>
</tr>
<tr>
<td>D</td>
<td>Input activates Color 1. Touch activates Output.</td>
</tr>
<tr>
<td>E</td>
<td>Input activates Color 1. Touch activates Output. Touch with inactive input activates Color 2.</td>
</tr>
</tbody>
</table>

**MULTIPURPOSE:** Full color control via three inputs independent of button; momentary output follows button

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>F2</td>
<td>Three inputs activate three colors. Color 3 overrides Colors 1 and 2, and Color 2 overrides Color 1. Touch changes output state.</td>
</tr>
</tbody>
</table>

**ILLUMINATED BUTTONS:** One or two colors with momentary or latching bipolar outputs that follow button

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>H</td>
<td>Power activates Color 1. Touch changes bipolar output state and activates Color 2. Latch and momentary options.</td>
</tr>
</tbody>
</table>

**SPECIALTY PICK-TO-LIGHT:** Three-color logic options for error-proofing, picking, putting and verification

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>C3</td>
<td>Input activates Color 1. Touch with active input activates Color 3 and Output. Touch with inactive input activates Color 2 and Output.</td>
</tr>
<tr>
<td>C4</td>
<td>Input activates Color 1. Touch with active input activates Color 3 and Output. Touch with inactive input activates Color 2 and Output for 5 seconds.</td>
</tr>
</tbody>
</table>

**MODBUS:** Color control and input monitoring via Modbus RTU

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>S1</td>
<td>Modbus commands activate Colors. Touch activates Modbus output.</td>
</tr>
</tbody>
</table>
The actuation method is the means by which an operator’s actions are sensed. Banner’s Pick-to-Light line includes a variety of actuation methods, including contact and non-contact sensors covering a single point on a small bin or a wide opening on a large bin. These actuation methods enable error proofing in a large variety of assembly and kitting applications. Below is a description of each actuation method offered to help you select the best solution for your specific application.

**Push Buttons**
Push buttons take physical force to press and actuate the button.

**Touch Buttons**
Touch buttons can be actuated with no force, just contact with the surface. The contact can be made with a whole hand, palm or finger.

**Fixed-Field Mode**
Background suppression sensors have a definite limit to their sensing range, ignoring objects that lie beyond their range.

Fixed-field sensors compare the amount of reflected light that is seen by two differently aimed receiver elements. If the light reaching the second receiver element is equal to or greater than the light reaching the first receiver element, then the object will be recognized.

**Emitter/Receiver**
In opposed-mode sensing, the sensor’s emitter and receiver are housed in two separate units. The emitter is placed opposite the receiver, so that the light beam goes directly from the emitter to the receiver.

**Retroreflective Mode**
Retroreflective sensors contain both the emitter and receiver elements. The beam(s) is(are) established between the emitter, the retroreflector and the receiver. An object is sensed when it interrupts or "breaks" the effective beam.

**Diffuse**
With a diffuse-mode sensor, the object is detected when the object reflects the sensor’s transmitted light energy back to the sensor.
S22 Flush-Mount Touch Buttons

- Large, bright illuminated area for clear visibility of input and touch status
- Flush mount design sits tight against panel, machine and bracket surfaces
- Independent color control or preconfigured models to suit your indication needs
- Momentary versions remain activated as long as touch is present, while latching versions toggle between activated and not activated states on successive touches
- Excellent immunity to false triggering by water spray, detergents, oils, and other foreign materials
- Rugged, water-resistant IP69K design for washdown environments
- Ergonomically designed to eliminate hand, wrist and arm stresses, requiring no physical pressure to operate and can be actuated with bare hands or work gloves

**RGB Multicolor**

### Supply Voltage
10 to 30 V dc

### Supply Current
100 mA max current (exclusive of load)

### Supply Protection Circuitry
Protected against reverse polarity and transient voltages

### Construction
- **Housing:** Polycarbonate or FDA grade plastic, depending on model
- **Translucent dome:** Polycarbonate or FDA grade plastic, depending on model
- **Mounting Nut:** PBT or FDA grade plastic

### Environmental Rating
- **Standard:** UL Type 4x, 13
- **FDA Grade:** UL Type 4x (indoor)
- **Cable, Pigtail, QD models:** IEC IP66, IP67, IP69K per DIN 40050-9 on front and back
- **Terminal models:** IEC IP66, IP67, IP69K per DIN 40050-9 on front only

### Connections
- 2 m PVC integral cable, integral Euro-style QD
- 150 mm Euro-style pigtail QD or terminal screws

### Operating Conditions
- **Temperature:** −40 to +50 °C
- **Storage Temperature:** −40 to +70 °C

### Certifications
- **CE**
- **UL**

Touch Buttons

- Replaces capacitive touch switches and mechanical push buttons
- Features illuminated base (to provide a bright, easy-to-see job light) solid, flashing or multiple color models available
- Offers choice of models with red, green or blue job light
- Require no physical pressure to operate, eliminating hand, wrist and arm stresses associated with repeated switch operation
- Offers a cost-effective and easy-to-install pick-to-light solution for areas that cannot accommodate a light screen
- Cuts through heavy airborne contamination to function in almost any environment
- Withstands exposure to a variety of chemicals, depending on model

* Washdown cover can be ordered separately or ad-WC to the end of the model number

Supply Voltage: 12 to 30 V dc

Construction:
- Upper Housing: Polycarbonate/Polymide
- Base: White polycarbonate

Environmental Rating: IP65, IP69K with cover

Operating Temperature:
- Temperature: –25 to +55 °C (−13 to +131 °F)
- Humidity: 45% to 85% RH (no condensation)

Certifications: [UL] [CE]

CSS Series Hookup Cordset Solution

This interconnection solution allows for quick hookup of a series string of emergency stop buttons. The user must ensure that the CSS series hookup cordsets are installed so that they cannot be easily defeated by not allowing access to the QD connectors or allowing improper connection bypassing the function of the Emergency Stop.

Cordsets available on page 119

![CSS Series Hookup Cordset Solution](https://www.comoso.com)
Flush-Mount Illuminated E-Stop Buttons

- Available with two-color: yellow (or green) and red or one color: red
- Rugged design rated to IP65
- Available with illuminated Safety BUS Gateway compatibility
- Latching design complies with ISO 13850 direct (positive) opening operation per IEC 60947-5-1
- Safe Break Action ensures NC contacts will open if the contact block is separated from the actuator
- Multiple buttons can be interfaced and series connected with CSS Series Hookup Cordsets
- Compliant with ANSI B11.19, ANSI NFPA79, and IEC/EN 60204-1 Emergency Stop requirements

K50 Pick-to-Light Touch Buttons

- Ergonomic design requires no physical pressure to operate, preventing stress on hands and wrists
- Simple operation with the touch of a finger, hand or whole palm
- Easily actuated with bare hands or work gloves
- Rugged, fully encapsulated IP69K construction for high-pressure wash-down environments
- Models with either latching or momentary outputs
- Ideal for pick-to-light and call button applications in a variety of industries
- One-, two- and three-color models available to solve a variety of applications
One- or Two-Color

K70 Illuminated Pick-to-Light Touch Button

- Excellent immunity to false triggering by water spray, detergents, oils, and other foreign materials
- Ergonomically designed to eliminate hand, wrist, and arm stresses associated with repeated switch operation; requires no physical force to operate
- Can be actuated with bare hands or work gloves
- Rugged IP65 polycarbonate construction
- Momentary versions remain activated as long as touch is present
- Latching versions start up not activated and toggle between activated and not activated on successive touches
- One-, two- and three-color models available

PVD
Diffuse/Retroreflective Parts Verification Array

- One-component system, easy to mount and even easier to use. Automatically operates in either diffuse or retroreflective mode, depending on the application
- Automatic setup and adjustment; wide beam pattern provides easy alignment
- Range up to 2 m (6.5 ft) when used with retroreflective target; 400 mm (15.7 in) when used in diffuse mode
- Large job lights on either side of the metal housing can be remotely controlled to initiate user action with a solid or a blinking green light; job lights turn red to indicate bin-picking errors
- Compact package size; only 30 mm wide x 15 mm deep (1.2 in x 0.6 in)
- Available in 2 lengths to fit existing parts bin sizes and configurations
- Heavy-duty protective brackets available
Sensing Range
Retroreflective: 2 m
Diffuse: 400 mm

Supply Voltage
12 to 30 V dc

Construction
Housing: Black painted aluminum
Lenses: Acrylic
End Caps: Thermoplastic
Switch Cover: Thermoplastic

Environmental Rating
NEMA 2; IEC IP62

Operating Temperature
0 to +50 °C (+32 to 122 °F)

Certifications

PVL Retroreflective Parts Verification Array

- Cost-effective coverage with the highest reliability
- Opto-mechanical alignment with bright red emitter beams allows for easy setup
- Easy installation with no assembly required
- Can mount directly to racking profile vertically or horizontally
- Rugged, metal compact housing for high durability
- Highly visible, two-color integrated job LED arrows for confirmation of correct pick or indication of mis-pick
- Retroreflective tape can be placed on adjacent unit or one of the brackets for reduced installation costs
- Large mounting holes for securing directly to slotted racking systems
- Slotted housing design allows cable to exit on either end

PVA Opposed-Mode Parts Verification Array

- Compact package, available in 4 lengths to fit many sizes and configurations of existing parts bins
- Range up to 2 m (6.5 ft)
- Two-component system (asynchronous emitter and receiver) needs no sync wire or controller box.
- Clearly visible green job indicator lights mounted on either side of emitter and receiver housings; the light can be remotely controlled to initiate user action with a solid ON or blinking condition
- Two frequency settings to prevent crosstalk in close-proximity, multiple-array installations
- Heavy-duty protective brackets available
**Sensing Range** 2 m

**Supply Voltage** 12 to 30 V dc

**Construction**
- Housing: Black painted aluminum
- Lenses: Acrylic
- End Caps: PBT
- Switch Cover: Thermoplastic

**Environmental Rating** NEMA 2; IEC IP62

**Operating Temperature** 0 to +50 °C (+32 to 122 °F)

MQDC-430 9 m (30')
Backlights
A part to be inspected is placed between the camera and a bright, even light source. The result creates a silhouette of the target which is useful in edge detection, part presence and measurement applications.

Ring Lights
A Ring Light is affixed to the camera and both items can be mounted as one piece for convenience. This setup is useful for relatively small parts or close up applications.

Low-Angle Ring Lights
Also called a dark field illuminator, this specialty light has its LEDs mounted in a ring, pointing toward the part almost perpendicular to the camera’s direction of view. Low-Angle Ring lights create shadows and bright spots, and are useful in detecting changes in depth.

Directional Lights
Directional lights, available in a variety of housings, create shadows to detect changes in depth, illuminate specific surface angles, and avoid glare off reflective surfaces when directed at an angle away from camera.

On-Axis Lights
On-Axis, or coaxial, lights generates light that travels along the same axis as the camera’s direction of view. The camera looks down from the top, through the On-Axis light, to the target part below. This technique is useful in eliminating shadows, inspecting shiny objects, or inspecting for height changes.

Structured Lights
A laser line generator is an example of a structured lighting scheme. This technique uses a high quality, uniform laser line to infer the presence of a difficult to see target. As a three-dimensional part passes through the laser line’s path, the image of the laser becomes distorted so the camera can detect the part.

Washdown
The Banner portfolio of heavy-duty lights includes products suitable for use in washdown environments, hazardous locations, and high temperature applications. Several of these lights are resistant to common cleaning chemicals, as well being resistant to cutting oils and fluids, making them useful in harsh environments.
**Backlights**

**Washdown**

The Banner portfolio of heavy-duty lights includes products suitable for use in washdown environments, hazardous locations, and high temperature applications. Several of these lights are resistant to common cleaning chemicals, as well being resistant to cutting oils and fluids, making them useful in harsh environments.
Pro Editor is ideal for those who don’t have IO-Link, but who want more control and customization than a standard indicator. The Pro Editor software must be used with a Pro converter cable, which is sold separately.

IO-Link is an open standard serial communication protocol that allows for the bi-directional exchange of data from IO-Link supported sensors that are also connected through a master.

Pick-IQ is a purpose-built, Modbus compatible serial bus protocol that uses a Common ID to reduce the typical latency that results from polling multiple devices.

**WLS28-2 Multicolor**
- Three and five color models cover all standard indication states with only four wires to connect
- Combine illumination and multiple indication capabilities in a single device to simplify installation and improve ergonomics
- EZ-STATUS® promotes faster response to status changes and reduces the risk of costly mistakes and accidents

**Heavy-Diffuse WLS27**
- Now available with heavy diffuse windows for reduced intensity and a more uniform light distribution

**WLS15 Dual Color**
- Dual-color models with EZ-STATUS® combine illumination and indication in one light fixture

www.comoso.com
Challenge
• Operators standing close to the machine need to be alerted to changes in status
• Larger tower lights with a brighter light output can strain the eyes if a worker stands in close proximity for long periods of time

Solution
• TL30 tower lights display machine status with a clearly visible but comfortable light output that workers can be nearby for extended periods of time
• The slim 30 mm diameter is suitable for a wide range of machines, including equipment where space is limited
• Uniform indicator segments appear gray when off, eliminating false indication from ambient light

Challenge
• Visibility is critical for equipment inspection and maintenance on a skid
• The presence of oil or gas qualifies the area as Class I Division 2

Solution
• HLS27 provides bright light so personnel can verify equipment status
• The slim design easily fits under the roof without obstructing the work area or view
• Dimming options give the operator control of intensity and provide energy savings
• The HLS27 also fits cleanly in the control cabinet
• Color options are available for integrated, location specific status indication

Challenge
• Truck drivers need to know when to advance through the wash and when to wait or proceed with caution
• Most stoplights cannot withstand the harsh environment inside the wash and therefore cannot be mounted close enough to the process for drivers to easily see status changes. In addition, traditional stoplights are often not bright enough to see well in outdoor settings.

Solution
• WLS27 segmented strip lights provide reliable performance in harsh environments
• Bright light output and long length of the strip light generate highly visible indication that can be easily identified from a distance or at an angle
• WLS27 segmented models can display multiple conditions simultaneously like a standard tower light
• Cascadable for increased visibility with no additional wiring
Challenge
• Hard guards around robotic work cells can block overhead lighting, resulting in a dimly lit area
• Poor lighting makes maintenance more challenging to complete quickly and effectively, while harsh lighting can create an uncomfortable work environment for staff

Solution
• WLB72 strip lights brightly illuminate the area so staff can easily monitor and maintain equipment
• The diffuse window reduces glare and hotspots, which can cause eye strain
• Adding light where needed is a more budget-friendly solution than adding more high bay fixtures
• The energy-efficient LED lights provide years of maintenance-free operation and a low total cost of ownership (TCO)

Challenge
• Work cycles can vary in length, and periodically an operator will need to enter the robotic cell during a work cycle
• Shutting the robot off with an emergency stop button will bring operations to a sudden halt and can damage the robot as well as the material being worked upon

Solution
• OS80 Operator Switch is easy-to-install in any location
• Easily actuated by a gloved or bare hand without worry of false actuation
• The tactile operation and bright illuminated base indicator provides unmistakable mechanical and visual feedback when the OS80 has been actuated

Challenge
• Operators looking at the sensors were unable to see when the output was active
• Difficult to troubleshoot the issues that arose on the assembly line, causing costly downtime

Solution
• S15L In-Line Sensor Status Indicators can be mounted in-line with a sensor for 360 degree-visibility of power and status
• 4 LEDs contained in the device produce two colors, green and yellow, to identify power and output status
• Low-profile design makes it ideal for bright indication in tight spaces

Challenge
• Manufacturers want to find ways to streamline productivity on their assembly lines
• Operators frequently grab from the wrong location and install incorrect components

Solution:
• Pick-to-Light Solutions Kit is an enclosure with a DXM Controller on the inside and an HMI on the outside that is ready to connect to power and PTL110 devices
• The built-in configurations decrease installation costs, improve pick sequences, and ensure flexible pick functionality
• Pick-to-Light devices and systems help manufacturers reduce the risk of error in the assembly process, boosting product quality and reducing cost
